

Quality, Speed, Reliability

MW Powder Coating is dedicated to providing the highest quality powder coated finishes to our customers nation wide. Our quick change over capability allows us to meet your batch run needs in addition to long continuous runs. We understand that today's competitive environment demands quick turnarounds, low cost and high quality so we have built our entire operation on meeting those requirements.

MW Powder Coating

a division of Mid-West Metal Products Co., Inc.

Our powder coating line can accommodate a part size of 36" x 50" with lengths up to 14 feet and weights up to 40 lbs per foot! We can coat wire, sheet metal, structural steel, tool steel, weldments, tubing, aluminum and any ferrous and non-ferrous metals.

In addition to providing you with a high quality powder coat finish we can perform special packaging, labeling, bar coding and masking.

Additional capabilities include:

- Drop Shipping
- Bar Coding
- EDI
- In house tooling/racking
- Color Matching
- Prototyping

Regardless if you have 10 parts per day or 1,000 parts per day we look forward to the opportunity to quote powder coating your parts for you.
